INDEX

	Page
Accuracy of Moulded Threads in Plastic Material	172
Aerodynamic Design of Wing Strut Roots	57
Aircraft Engine Bearings	75
Airscrew as a Landing Brake	231
Aluminium in Electrical Engineering	175
Arc Welding of Magnesium Aircraft Structures	294
Automatic Devices Aid Stamping and Pressing	121
Automatic Sizing Gauge for External Cylindrical Grinding Machines	45
Back Axle Drive or All Wheel Drive for Heavy Lorry with Trailer	216
Bakelite Board as a Source of Corrosion	351
Bright Annealing of Steel Strip in Electrically Heated Bell-type Furnaces in a Russian Steel Mill	329
British-American Engineering Collaboration	305
Brown Boveri Mercury Rectifiers (Mutators)	60
Calculation for Rubber Springs	123
Calculation of Box Type Frames	42
Calculation of Stiffened Shells in Metal Aeroplane Design	277
Carborundum in Foundry Practice	55
Cement as Material for the Construction of Casting Moulds	116
Centrifugal Contact Governor for Universal Motors	91
Code for Working Stresses, Part I.—Static Stresses	2
Code for Working Stresses, Part II.—Fatigue Stresses	35
Composite Stampings Relieve Critical Shortages	49
Compressed Gas for Motor Vehicles	322
Compressibility	16
Construction and Protection of Modern Grids	89
Contribution to the Chemistry of Steel Works Analysis	141
Contribution to the Metallurgical Treatment of Malleable Cast Iron	157
Control of Automatic Conveying Plants	155
Coupling of the Blades of Variable Pitch Airscrews	282
Cutting Oil	48
Design of D.C. Magnets	202
Design of Highly Stressed Studs to improve Fatigue Strength	239
Determination of the Friction Moment of Gyroscopes	262
Determination of Very Small Out-of-Balance Forces	330
Development of Super-Tension Cables in Great Britain	359
Direct Pneumatic Hammer Riveting in Aircraft Production	196
Diving Speed Calculation	271
Effective Cooling for Machining	46
Effectiveness of Ailerons at High-Speed Flight	18
Effect of Graphite Particle Size in the Inoculation of Grey Cast Iron	349
Efficient Use of Materials in Design by Means of Correct Stressing	317
Elastic Deformation of Yokes	237
Electric Grass Drying	48
Electronic Elimination of Oil Mists	205
Electronic Sorting and Testing	355
Electrostatical Charges on Driving Belts	110
Electrostatic High-Frequency Heating makes possible New Designs	107
Energy Conversion in Gas and Oil Turbines	314
Engine Cooling Problems Arising in Motor Car Design, Part I.	185
Engine Cooling Problems Arising in Motor Car Design, Part II.	210
Extensometer Measurements on the Back Axle of a Lorry, Part I.	126
Extensometer Measurements on the Back Axle of a Lorry, Part II.	136
Fluorescent Lamps in the U.S.A.	118
Formation of Zinc-Iron Alloy in the Process of High Temperature Galvanisation	144
Freezing of Acids in Accumulators	200
Friction of Wire Ropes on Driving Pulleys	312
Gas Producers for Buses	337
Gas Temperature Measurements in Internal Combustion Engines	67
Gas Turbine with Waste Heat Utilization by Air Pre-Heating	352
Glass Fibres—A New Engineering Material	353
Glass for Precision Gauges	263
Glueing of Presspahn	230
Heating by Reversed Refrigeration	51
Heat Treatment of Steel from Rolling Temperature	244
High Strength Structural Steels	311
Hot Air and Combustion Turbines in the Steam Power Plant	347
How to Maintain Industrial Trucks	290
Hydraulic Ram working on Wave Propagation, Part I.	151
Hydraulic Ram working on Wave Propagation, Part II.	174
Hydraulic Turbine Practice of the T.V.A.	193
Improved Connection Diagram Speeds up Manufacturing Process	223
Improving Fatigue Strength of Machine Parts	249
Improved Volumenometer	63
Influence of Deformation on the Internal Loads of Beams with a Straight Axis	133
Influence of Molybdenum and Vanadium Additions on Low-Tungsten Highspeed Steels	143
Influence of Reynolds' Number at High Mach Numbers	199
Influence of Riveting Tools on the Driving of Heat-Treated Light Metal Rivets	197
Inkless Recording	12
Investigations of Water Turbine Regulators	5
Iodine and Potassium Chloride from Metallic Dust from Blast Furnaces	27
K-Profile Shaft Seat	361
Leakage Currents, their Cause and Properties	90

	Page
Light Alloy Pistons for Internal Combustion Engines	82
Light Meter	14
Liquified Gas Fuel for Diesel Engines	85
Load Carrying Capacity of Plastic Bearings	77
Load Test on Bearing Supports of 27,500 kVa Hydro-Electric Units	327
Machine for Compressing the Surface of Screws to Improve Fatigue-Strength	19
Mago Coupling made by Metalastik Ltd., Leicester	357
Measurement of Impurities (Metal) in Dirty Oil	88
Measurements	11
Measuring Mechanical Vibrations	356
Microscopic Method of Measuring Surface Roughness	20
Milling Stone with Metal Carbide Cutters	362
Miniature Instruments	11
Mobile Transformer Station for Agricultural Machines and Building Sites	225
Modern Hardness Testing Machines	339
Modulator Control for Multi-Fuel Fired Furnaces	299
Most Efficient Lay-out of Electric Arc-Furnace Steelworks	24
Moulded Plastic-Bonded Veneers and Wood in Aircraft Construction	168
Natural Frequency of Oscillation of Spring Mounted Machines	324
New B.M.W. Combination with Wheel Drive	93
New Contact Types for Switchgear	341
New Devices for Holding the Material in Electric Butt- and Flash-Welders	119
New Heat Treatment for the Improvement of Modern Steels	269
New High-Precision Method for Short-Circuit Measurements on Transformers	156
New Instrument Transformers	265
New Lowering Brake for Three-Phase Electric Cranes	287
New Low-Temperature Test Chamber	343
New Single-Pole Service Restorer	61
Nitriding Process and Steel Corrosion	180
Non-Destructive Measuring Methods for Anti-Corrosive Coatings	255
Notched Bar Impact Strength of Steels for Aircraft Production, Part I.	245
Notched Bar Impact Strength of Steels for Aircraft Production, Part II.	261
Occurrence of the Phenemenon of Ageing in Cast Iron	172
Photo-Magnetic Defectoscope	117
Portable Electrical Ventilator for the Workshop	81
Portable Universal Drilling Machine for the Assembly Shop	82
Powder Metallurgy, Part I.	31
Powder Metallurgy, Part II.	53
Power Consumption in the Rolling of Steel Shapes	308
Practical Turbine Lubrication	194
Problems in Aircraft Structural Research, Part I.	145
Problems in Aircraft Structural Research, Part II.	166
Problems in the Use of Plywoods in Aeroplane Constructions	99
Production of Aluminium from Blast Furnace Slags	323
Production of Hard Metal Alloys and their Use for Replacement of Diamonds in the Drawing Industry	266
Progress in Engineering Knowledge during 1942	161
Progress in Gear Construction	320
Progress in Heat Treatment of Alloy Cast Iron	348
Radiant Heat Transmission	233
Rail Car with Charcoal Gas Producer	310
Recent Developments in Two-Stroke Engines	181
Redesign and Substitute Materials for Fittings	242
Remote Transmission and Recording of Torque, Speed and Power	96
Research and the War Effort	131
Resistance Welds with Electronic Control	104
Rivet Wire and Rivets of A1-Cu-Mg Alloys	291
Rubberless Tyres	316
Saving Material and Labour in the Mass Production of Electric Apparatus	284
Scatter of Results of Hardness Testing	38
Screening Investigations	334
Sheathing of Electric Conductors with Polyvinyl Chlorides	288
Sheet Metal Stitching Machine	235
Spot Welding of Aluminium and Aluminium Alloy Sheet Metal with a 60 kVA Machine	70
Steam or Gas-Turbine?	313
Strength of A1-Mg-Alloys at the Temperature of Liquid Oxygen	10
Strength of Plastic Mouldings from Composite Materials	21
Stress Increase in Hollow Sections under Torsion	273
Surface Compression a Means of Increasing the Fatigue Strength of Springs used in Motor Vehicles	111
Surface Currents on Plastics	207
Swedish Aero Engine of 2500 h.p.	333
Technique of Melting and the Casting Properties of Aluminium and Aluminium Alloys	73
Temperature Measurements on Buried High-Tension Cables	226
Testing of Substitute Materials for Bearings and Gears of Machine Tools	258
Theory of the Potential and the Technical Practice of Electro-Deposition	274
Thermal Expansion of Copper Alloys	274
Thermal Expansion of Laminated Plastics	184
Thermodynamic Possibilities of a Compound Diesel	307
Thoma-Demag Gear	95
Threads in Plastic Mouldings	101
Threshold Treatment of Cooling Water by Sodium-Hexameta-phosphate	300
Tinning of Light Metals by Means of Ultra Sound	338
Transmission of Heat between Vertical Walls and Turbulent Water Films	286
Turbo-Compressors in the Metallurgical Industry	113
Use of Acid Slags in Conjunction with Fluxes for Desulphurisation	228
Use of Cupola-Furnace for Metallurgical Purposes in the Melting of Cast Iron	115
Use of Propane Gas for Heating Purposes in the Laboratory	180
Welding Cracks in Chromium-Molybdenum Structural Steels	236
Welding Sets of Instantaneous-Reaction Type for d.c. Arc Welding	188
Zeiss-Ikon Slow-Motion Camera	215
